From Humble Beginnings to Fortune 500

When 3M began in 1902, our five founders had a simple goal: to mine for corundum, a mineral ideal for making sandpaper and grinding wheels. Turns out, what they thought was corundum was really another low-grade mineral called anorthosite.

Discovering the poor-quality mineral could have caused an early end to our fledgling company, but our founders persisted. Why? Because something more important was born that first year: the spirit of innovation and collaboration that forms the foundation of 3M today. So instead of calling it quits, we turned to different materials, applied them to other products, gained the trust of important investors and built up sales little by little.

Scientific, technical and marketing innovations produced success upon success over the years, eventually making 3M a constant name on the Fortune 500 list. Today, more than 60,000 3M products are used in homes, businesses, schools, hospitals and other industries. One third of our sales come from products invented within the past five years, thanks to innovations from the thousands of researchers and scientists we employ around the world.

With corporate operations in 70 countries and sales in 200, we are committed to creating the technology and products that advance every company, enhance every home and improve every life.

Our large portfolio of Electrical products help energy companies deliver energy efficiently and reliably to their customers. The portfolio includes solutions for power cable accessories from low to high voltage, insulating and sealing, locating and marking, cable repair, jointing/terminating/grounding, fire retarding, arc proofing, and electrical maintenance solutions.
